

ESHIBA CANCER CARE

Incorporated in the State of Georgia, ESHIBA CANCER CARE (ECC) is the United States educational and charitable organization dedicated to increasing awareness on cancer prevention and providing non-medical support for patients and their children, families, caregivers, and survivors of the disease worldwide.

Our Mission is to increase community awareness and advance health equity through cancer education and prevention.

Our Target Populations are marginalized communities of Metro Atlanta, Africa, and worldwide.

This fight belongs to all of us,
we want to give you the
support you need.

We have a complete professional team to provide Cancer Education, Resources, Support, and Referrals to Medical Practitioners. If you need assistance, or would like to volunteer, please contact us at: 678-367-9084.

Cancer Education & Prevention

We envision
a cancer-free society,
where everyone thrives.

WHAT IS CANCER

According to the Center for Disease Control & Prevention CDC, Cancer is a disease in which cells in the body grow out of control.

WHAT IS BREAST Cancer

Breast cancer is a disease in which cells in the breast grow out of control. Visit CDC at https://www.cdc.gov/cancer/breast/basic_info/index.htm

Each year in the United States, about 240,000 cases of breast cancer are diagnosed in women and about 2,100 in men. About 42,000 women and 500 men in the U.S. die each year from breast cancer (CDC, Nov, 2023)

Black women have a higher rate of death from breast cancer than all other women. (CDC, Division of Cancer Prevention & Control Jul,2023)

What Are the Symptoms

- New lump in the breast or underarm (armpit).
- Swelling of part of the breast.
- Irritation or dimpling
- Redness or flaky skin...
- Some times, NO Symptoms

What Are the Risk Factors

Studies have shown that your risk for breast cancer is due to a combination of factors. The main factors that influence your risk include being a woman and getting older(CDC).

Regular mammograms are the best tests doctors have to find breast cancer early.

WHAT CAN I DO TO REDUCE MY RISK OF BREAST CANCER?

Many factors over the course of a lifetime can influence your breast cancer risk. You can't change some factors, such as getting older or your family history, but you can help lower your risk of breast cancer by taking care of your health in the following ways

- Keep a healthy weight.
- Be physically active.
- Healthy eating
- Choose not to drink alcohol, or drink alcohol in moderation (CDC)

Breast cancer does not distinguish between race, sex or religion, take care of yourself.
